## Boards

The **Nagnath Techno Industries** can be effectively utilized to replace wood & other wood based panel materials such as plywood, Particle Board, etc. These composite Boards are currently being used for mass applications in building and construction segment, as furniture & interior for home & offices, as industrial Pallets, packing boxes in the Secondary packaging segments. It is thus a direct substitute for wood, a precious natural resource. The standard size presently offered are 8 ft. x 4 ft. thickness of 4 mm, 6 mm, 8 mm, 12 mm, 15 mm, 18 mm.

11	Compression Strength	Limited	Limited	Limited	Normal	Normal	Normal

## Features & Advantages

- The Boards are easy to cut. Normal Wood Working tools & machinery can be used.
- The Boards will not rot, crack, warp or splinter & unlike wood there are no knots.
- The Boards do not get effected by termite, borer, bacteria etc.
- The Boards are resistant to mild chemicals, oil, gasoline, pathogens.
- The Boards are 100% boiling water proof & salt water proof.
- The Boards are not effected by exposure to most substances.
- The Boards are denser than wood & have high compression strength.
- The Boards can be SAWN, MOLDED, SCREWED like other wood products.
- The Boards are virtually maintenance free longest life, hence saves valuable cost.
- The Boards do not expand under varying climatic conditions.
- The Boards are impervious to insects.
- The Boards are stain resistant.
- The Board are aesthetically pleasing.
- The Boards are recyclable.
